Segment	BETP Short term (Spot)
Product Name	Day Ahead (DA) and Weekend/extended weekend (WE)
Description	The product Day Ahead (DA) provides trading for the next gas day. The product Weekend/extended weekend (WE) provides trading with delivery period starting from Saturday to Sunday gas days, Saturday to Sunday, extended to include public holidays adjacent to Saturday and Sunday.
Delivery Point	National VTP Bulgaria operated Bulgartransgaz EAD gas transmission system.
Delivery	All contracts lead to physical delivery according to the network code in Bulgaria. Day ahead (DA) - The delivery begins at 07:00 a.m. EET on the gas day following the day of the transaction and lasts 24 hours, adjusted with the summer/winter time transitions. Weekend/extended weekend (WE) - The delivery begins at 07:00 a.m. EET on the first gas day of the weekend / extended weekend and lasts till the end of the delivery period (from 48 to 120 hours), adjusted with the summer/winter time transitions.
Contract unit	MWh/d for the delivery period.
Minimum contract size	1 MWh/d
Minimum lot size	1 lot (minimum volume = 1 MWh/d)
Volume tick	1 lot (volume tick = 1 MWh/d)
Price unit	EUR/MWh
Price tick	0,01 EUR/MWh
Time	Eastern European Time (EET) is being used, taking into account the transition to summer and winter daylight saving time.
Trading session	The DA product session opens at 03:00 a.m. and closes at 03:00 a.m. on the next day. The WE/extended WE product session opens 2 business days before the start of the delivery period, in general on Thursday at 03:00 a.m. and closes in the

	delivery day at 03:00 a.m. In case of a holiday preceding the weekend period the trading session opens on the prior business day to Thursday in order to have at least 2 business days between start of trading and start of delivery period.
Trading days	DA - Continuous trading - 7 days per week, 24 hours per day. WE / extended WE – minimum 2 days per week, starting on a specific day according to the trading session. For the WE product the trading days are according to the Trading Calendar of BETP.
Delivery size	DA - the delivery size equals the contract size. WE / extended WE - the delivery size equals the contract size (in MWh/d) multiplied by the number of days of the given period.
Clearing and Settlement	Clearing and settlement is according to the Market Rules and the Collateral Policy of BETP AD.
Trade notification to the TSO	BETP AD notifies the Transmission System Operator (TSO) of a concluded trade.
Data reporting to ACER under REMIT	All trading data must be reported to ACER under REMIT applicable regulations. BETP AD arranges the reporting services for the Market participants to comply with the reporting obligations.
Data publishing	Summarized market data is published on the website of BETP AD for each day of trading.
