Market Notice

No: 5/2026

Date: 04.11.2026

Subject: Update of the documents published on betp.bg

Dear Members,

The documents published on betp.bg have been technically updated, with no change in substance to the rules. Amounts in BGN have been replaced with amounts in EUR in the Day Ahead, Within Day and Long-term product specifications, in the Agreement for the Registration of OTC Transactions, Nomination and REMIT Reporting, in the Banking fees for intrabank and interbank collections and payments, in the Auction initiation application and in the Reference Price Methodology. The product specifications have been aligned with the Product Specifications Manual of 13.03.2026, whose Bulgarian version has been corrected for technical errors. The Bulgarian version of the Bilateral contracts (Long term segment) specification now states that standardised forward products are registered as Bilateral (OTC) transactions on each trading day from 09:00 to 18:00, between members of the BETP market or with third parties that have signed an Agreement for the Registration of OTC Transactions.

The Membership Procedure now states BRM's guarantee account in EUR, and that a bank guarantee may be issued by a commercial bank authorised in Bulgaria or Romania and accepted by BRM, in line with the Collateral Policy. In the "Application for recovery of funds", the amount is in EUR and the funds are those deposited to the account of BRM. The form "Performance guarantee refund bilateral agreement" has been removed.

A Bulgarian translation of the Regulations on Clearing, Settlement and Risk Management of the Romanian Commodities Exchange as a Central Counterparty has been published in the Clearing and settlement section (Bulgarian site). In case of discrepancy, the Romanian version prevails.

Should you have any questions, please do not hesitate to contact us.

Sincerely,

The BETP Team
